

execute maven test from cmd

1. add "maven-surefire-plugin" to pom.xml file
2. add profiles. In profiles provide different profile tags. profile contains id tag.

profile tag contains <suiteXmlFile>. suiteXmlFile tag contains testng xml file.

➔ I faced error while executing maven test from cmd.

```
C:\Users\91766\workspace\FrameworkDesign\maven test

```

➔ To resolve error change the compiler version.

1. Right click on project and select properties.
2. click on "java compiler".

➔ change java version:

1. Right click on project and select properties.
2. click on "java Build Path".
3. Double click on JRE System Library, It open list of java versions.
4. click on version which one you want.

Note:

1. D stands for maven parameters.
